IDENTIFIERS	*Kentucky

ABSTRACT

In 1998 the Kentucky legislature directed the state's Board of Education to redesign the assessment and accountability system. As a result, the Commonwealth Accountability Testing System (CATS) was developed. Because of the major changes in the system, trend lines cannot be drawn to the previous assessment, the Kentucky Instructional Results Information System. This document contains the CATS results for elementary, middle, and high schools for the CATS core content tests. Some comments on student achievement on the various tests are included, highlighting areas of improvement in reading and mathematics. Tables contain the regional and state accountability index scores by content and for elementary, middle, and high school levels. Preliminary score reports are attached for the three school divisions for individual schools and districts. (Contains six tables and three lengthy charts of school and district results.) (SLD)

Reproductions supplied by EDRS are the best that can be made
from the original document.

COMMONWEALTH ACCOUNTABILITY TESTING SYSTEM
KENTUCKY CORE CONTENT TEST SCORE RELEASE 1999

INTRODUCTION

House Bill 53, passed in spring of 1998, directed the KY Board of Education to redesign the assessment and accountability system. Through a broad and collaborative process involving educators and citizens of KY, the Commonwealth Accountability Testing System (CATS) resulted. Many changes were made in the system first administered in the spring of 1999. The changes were made in order to improve the reliability and validity of the test, reduce testing time and make the system fairer and easier to understand. Those changes include, but are not limited to:

- Distributing the test components for the high school from primarily the junior year to across three grade levels; reading and practical living/vocational studies in grade 10, math, science, social studies and arts and humanities in grade 11 and writing on demand and writing portfolios both in grade 12;
- Reducing the contents of the portfolio in each accountability year – grade four from 6 to 4 pieces, grade 7 and 12 from 6 to 5 pieces; also creating a regulation that directs instructional use, editing and scoring of the portfolio;
- Limiting the student to answers on the open response to the space provided – one 8 ½" x 11" sheet;
- Counting multiple choice questions on the KY Core Content Tests and weighting them 33% of the score and the open response at 67% of the academic index;
- Giving schools incremental credit for novice and apprentice growth in reading, math, science and social studies: nonperformance is 0 points, medium novice is 13, high novice is 26, low apprentice is 40, medium apprentice is 60, high apprentice is 80, while proficient remains 100 and distinguished at 140. For writing, arts and humanities and practical living/vocational studies the nonperformance will be 0, a novice will receive 13 points and each apprentice will receive 60 points while proficient and distinguished are 100 and 140, respectively.
- Reducing the testing window from 3 weeks to 2 weeks.

INAPPROPRIATE USE OF THE 1999 SCORES:

Because of these major changes in the system, the trend lines between KIRIS and CATS have been severed. We are one year into setting the new baseline for the long-term accountability model. Words like 'gain', 'growth', 'improvement', or 'decline' will not be appropriate ways to describe the scores. If a school's scores are higher numerically than 1998, will it be because the teachers did a better job of teaching, more powerful instructional techniques were used, the students were smarter or any of the previously discussed changes caused the scores to go up? No one will be able to completely point to why the scores went up because of all of the variables. The same is true if the scores are lower than in previous years. Trend lines are nonexistent from 98 to 99. You can look at previous trends with KIRIS as background or historical input but now we are establishing new baselines for comparison.

APPROPRIATE USE OF SCORES:

Schools can and should compare their scores to the absolute standard of 100 on a 140-point scale to gauge how well their students performed. Schools receive an extensive report of the data collected from their students' results. This report, the KY Performance Report, should be used to generate discussions about curriculum and instruction at the school as it affects both the total student population and individual students needs. Decisions about what instructional strategies to use in a subject can be made based on the needs identified through an analysis test results. Looking at strengths and weakness, data by gender, ethnicity and disability, data on students in particular programs and the performance of students receiving certain interventions such as Extended School Services compared to the performance of the whole student population can generate quality discussions among education staff as they plan the instructional year.

KENTUCKY CORE CONTENT TESTS
STATE AND REGIONAL RESULTS 1999

OBSERVATIONS

ELEMENTARY SCHOOL PERFORMANCE:

- Students are tested in grades 4 in reading, writing and science and grade 5 in mathematics, social studies, Arts and humanities, practical living and vocational studies. The format is a mixture of multiple choice questions, open response questions, writing portfolios and a writing test.
- Compared to the goal of 100, students scored highest in reading at 76.4.
- In reading, 32% of the students scored proficient or distinguished with 31% of the students scoring high apprentice. Only 3.8% remain in the novice category.
- The second highest performance was shown in mathematics at 64.1.
- In Mathematics 11.15% of the students scored above the state standard and received a distinguished performance judgment. 10.4% students scored proficient and 18% scored in the high apprentice range.
- The lowest performance areas are still arts and humanities and practical living/vocational studies.

MIDDLE SCHOOL PERFORMANCE:

- Students are tested in grades 7 in reading, writing and science and grade 8 in mathematics, social studies, arts and humanities, practical living and vocational studies. The format is a mixture of multiple-choice questions, open response questions, writing portfolios and a writing test.
- Compared to the goal of 100, reading and mathematics showed the highest achievement at 67.6 and 67.1, respectively.
- In reading, 13% of the 7th grade students were proficient or distinguished with 34% scoring high apprentice.
- In mathematics, 14.29% of the students scored distinguished, 18.9% proficient and 11.8% high apprentice.
- The lowest areas of achievement were practical living/vocational studies (33.7) and science (36.9).
- While writing did not show the lowest overall score, 50% of the students in grade 7 are still scoring in the novice level. This represents an area of concern .

HIGH SCHOOL PERFORMANCE:

- Students are tested in Grade 10 in reading and practical living/vocational studies; Grade 11 tests mathematics, science, social studies, arts and humanities; grade 12 students take the writing test and complete the writing portfolio.
- The main 4 core subjects of reading, mathematics, science and social studies showed scores all within a range of 66.3 to 67.3 compared to the state goal of 100.
- The highest were mathematics and social studies at 67.3 and 67.2, respectively.
- The lowest achievement was shown in arts and humanities and practical living/vocational studies.
- In mathematics, 32.8% of the students scored proficient or distinguished with 15.5% in the high apprentice category.
- In Social Studies, 30 % of the students scored proficient or distinguished with another 19.5% scoring high apprentice.
